

Software Engineer

Description

Signum is accepting applications for a Software Engineer to join our engineering team. Our engineers develop custom electronics and firmware for various industries including off-road vehicles, oil and gas extraction, medical devices, and construction machinery. We also create cloud-based software systems for connected devices and Internet of Things applications.

Qualifications

- Bachelor's degree in computer science preferred or equivalent certification and experience
- UI/UX experience with React or similar technology
- Experience writing application code in various programming languages such as JavaScript, C#, .NET core, Python, or Java
- Knowledge of databases especially PostgreSQL and MongoDB
- Familiarity with cloud server platforms such as Google Cloud, AWS, or Azure
- Proficiency with software tools such as Git, Docker, TerraForm

Responsibilities

- Design web portals and user interfaces for data access
- Write processes for collecting, processing, and storing data
- Create databases for efficiently managing data storage and access
- Use industry best practices for coding, testing, source control, and deployment of software
- Communicate effectively with team members, management and customers

The Signum Advantage

Signum is an exciting young company positioned for rapid growth. Our employees are exposed to a wide variety of projects and work at the cutting edge of Internet of Things (IoT) technology. Competitive pay and benefits add to a culture where people are valued not only for their technical skills but also as individuals with their own unique ways to contribute to the overall vision.
